

WorkGest®

Mobile

WgMobile contains all the power of WorkGest in the palm of your hand!

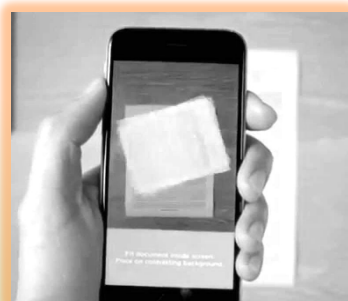

WorkGest and NeocodeX Software are registered trademarks.

WgMobile allows data collection with added photographs directly from the mobile device ...

The contents are entered in the Microsoft® SQL Database, to then be consulted also from the Web interface on the PC.

The combination of WgMobile + the iData 50 device offers a dynamic and effective solution for production control and defect detection.
